

# Outdoor Textile Protector 500 ml

## Softcare Outdoor Textile Protector 500 ml

Textile protector for outdoor furniture

Effective and easy-to-use protector for textile surfaces on outdoor furniture, sun shades, and interior of cars and boats.

Provides effective protection against all kinds of dirt and moisture by preventing dirt from being sucked into fabric fibres. Also reduces mould in fabrics as the fabric is kept dry. Suitable for users with pollen allergy as protection prevents pollen from sticking to fibres and makes the fabric easy to clean. Suitable for all textiles, both natural and artificial fibres. The treatment keeps the textile beautiful and easy to care for a long time. Does not change air permeability of the fabric, its looks or colour. The bottle of 500 ml is enough to protect 5-7 m<sup>2</sup>. Protection will last for about 1-2 years in outdoor use. Stains are easily removed from treated surface: just wipe them off with a cloth so that dust does not stick to the fibres. Protects against all types of stains, even oil based. Dry stains can be removed with a damp cloth. Spray bottle is aerosol-free.

Perform treatment in a well-ventilated area about 15 cm from the surface by spraying evenly on the dry, clean surface until surface is moist but not wet. First test colour durability on an invisible place and protect the surrounding surfaces. Does not contain PFOS or PFOA compounds. Not suitable for faux leather and plastic.

Packaged in aerosol-free bottle (500 ml), made from recyclable plastic which may be burnt or sorted as mixed waste. The product is highly flammable; do not smoke while using solvent or

Outdoor Textile Protector 500 ml

spray near an open fire.
