

Softcare Soot remover 500 ml

An effective and ecologically innovative soot remover. Removes soot stains from glass and other surfaces. Also removes stubborn soot. Does not scratch glass or otherwise damage surfaces. Not suitable for aluminium or galvanised surfaces.

Use: spray the compound on the soot-stained surface and allow it to act for a few minutes. Rinse off the soot that becomes detached. On porous surfaces (such as brick), moisten the surface with clean water first so that the loose soot is not absorbed into the pores.

Ingredients: plant-based soap, ethanol, surfactants, organic solvents, water.

Koko: 500ml

EAN-koodi: 6416977713432
