

Softcare Stain Remover 100 ml

Softcare Stain Remover 100 ml

for most common stains

Softcare Stain Remover is effective on any kinds of stains, old and new. Suitable for all textile materials. Removes oil, grease, blood, coffee, chocolate, grass etc. Contains no bleach or other dangerous components.

Spray on the stain and let work for a few minutes, then wipe away with a moisturized terry towel, repeat treatment for difficult or dried stains. When you remove the stain, wipe the stain inwards so you do not spread the stain. When you remove isolated stains you can prevent water rings by blurring the line between the wet and dry area by moistening the area from seam to seam or the entire surface of the cushion. You can also pre-treat stains before normal laundry. If you are unsure of how the fabric or colour reacts in the wash, try first on a small invisible area. The wear rate can be tested by rubbing a damp, invisible area with a terry cloth. If the surface gets fluffy, do not rub hard. Colour durability can be tested by rubbing the moistened area with a white cloth. If colour rubs off on the fabric, perform the cleaning very carefully, or leave it to a professional.

If you are cleaning a fuzzy fabric, wipe the moistened nap in one direction so that the end result is even. Content 100 ml. EAN 6416977712930
