

Softcare Textile Protector

Softcare Textile Protector protects all types of textiles, carpets, upholstery and leather from dirt and moisture. Softcare Textile Protector forms an invisible molecular net around textile fibres, preventing dirt and moisture from being sucked into the fabric. Softcare Textile Protector does not affect the properties of the fabric. Reduces laundry expenses and time with up to 80%.

Softcare Textile Protector is one of the market's most durable protection products; its effect lasts for up to 5 years. By extending the life of the fabric, Softcare Textile Protector lowers maintenance and purchasing costs. The treated surfaces are easy to clean, which speeds up the cleaning process and reduces the need for cleaning. It also reduces the impact on the environment.

Softcare Textile Protector is easy to use and it provides effective protection. It is a safe detergent when used in accordance with instructions and it meets the strictest environmental requirements. Softcare Textile Protector has protected many valuable places, for example state houses, official residences of royal families and heads of state, palaces and some of the finest hotels. It is also used on cruise ships, in convention centres, retirement homes and many public places. We have protected restaurants, ships, buses, trains and planes for over 20 years.

The product is flammable; do not smoke while using the product or use it near an open flame.

Ensure good ventilation, use a protection mask and protect surrounding surfaces. First test the product on an invisible place, for example the bottom of the furniture. Spray with an airless syringe. Not suitable for faux leather or plastic.

Mix well before use. Spray from a distance of 10-20 cm, evenly and gently on the surface so that no spots remain untreated. Allow the surface to dry completely before using it or packing it. Softcare Textile Protector reaches its final effect in about 2 hours in room temperature. Does not contain PFOS or PFOA compounds. Familiarize yourself with the safety instructions.

Dosage: 1 dl/m² for furniture textiles, 1.5 dl/m² for carpets.

Packaging: 5 L, 10 L, 200 L.
