Protection and care products for furniture and carpets

SOFTCARE FURNITURE PROTECTOR

Softcare Furniture Protector efficiently prevents upholstered furniture from becoming dirty and wet. The furniture protector forms a protection around the fibres of the textile, preventing oil- and water-based dirt from becoming absorbed into the textile. Dirt and stains can be removed easily from the protected surface. New furniture should be protected immediately, so that it remains beautiful and easy to care for. The protection does not affect the characteristics of the textile, and it does not change its breathability, flammability or colour. Furniture Protector is suitable for all textiles, including membrane materials. The protection can be renewed when necessary, when water no longer forms droplets on the surface of the textile. The protection will last 2–4 years, depending on the use.

SOFTCARE WATER BASED TEXTILE PROTECTOR

Softcare Water Based Textile Protector has been especially designed for protecting interior textiles and furniture. It is also suitable for other textile surfaces. The protector is water based, providing an efficient protection against dirt and moisture. The protection does not affect the characteristics of the textile or its flammability. Protect the new or cleaned textile by spraying the surface evenly and let dry. The protection will reach its full effect in 24 hours. The protection can be renewed when necessary, when water no longer forms droplets on the surface of the textile. Normally lasts for 2–4 years. Environmentally-friendly ingredients.

SOFTCARE TEXTILE CLEANER

Softcare Textile Cleaner is a cleaner that removes even difficult stains easily. Suitable for all textile materials. Also suitable for carpets and outdoor furniture upholstery. Always follow the manufacturer's cleaning instructions. The textile cleaner is sprayed directly on the dirty surface, allowed to react for a few moments, and then the surface is rinsed by wiping the dirt and the cleaner off with a damp cloth. Furniture can often be marked with a dry cleaning only label, but Textile Cleaner is also suitable for most materials that require dry cleaning. Test the product first on an area that is not visible. The cleaned textile must be thoroughly dry before use or before applying protection.

SOFTCARE TEXTILE CARE KIT

The kit contains:

- Softcare Furniture Protector
- Softcare Textile Cleaner
- Terry cloth and care instructions

SOFTCARE WATER BASED TEXTILE CARE KIT

The kit contains:

- Softcare Water Based Furniture Protector
- Softcare Textile Cleaner
- Terry cloth and care instructions

SOFTCARE CARPET PROTECTOR

Softcare Carpet Protector prevents dirt and moisture from becoming absorbed in the carpet. Carpets should be protected already when they are new so that they remain easy to care for and beautiful for longer. Carpet Protector is also suitable for ryijy-rugs and other interior textiles. The protection from a single treatment lasts for about two years. The protection does not affect the characteristics of the textile or its flammability. Liquid dirt can be wiped off from a protected surface, and vacuuming dry dirt is also easy. Stains can be removed with Softcare Textile Cleaner or Stain Remover. If the carpet has long fibres, brush the carpet after the protective treatment with a damp protective glove, so that the protection becomes properly absorbed all the way to the base of the carpet, ensuring a great protection result. Approximately 150–250 ml of the product should be used per square metre, depending on the length of the carpet fibres.

SOFTCARE CARPET CARE KIT

The kit contains:

- Softcare Carpet Protector
- Softcare Textile Cleaner
- Terry cloth and care instructions
- Protective gloves for treating shag rugs

Care products for leather furniture

Leather is a pleasant and durable upholstery material. However, genuine leather requires regular care to ensure its long lifespan. Nowadays, leather is also coated with polyurethane and other plastics. These materials include Pull Up, Bycast and Bonded leather. Caring for these materials requires the use of the water based Softcare products. Always ask for the manufacturer's care instructions.

SOFTCARE LEATHER PROTECTOR

Softcare Leather Protector provides efficient protection against moisture and water- and oil-based dirt. Leather Protector is suitable for all types of genuine leather, grain leather, as well as suede and nubuck, which cannot be treated with wax- or grease-based products. The alcohol-based Softcare Leather Protector must not be used on Pull Up, Bycast or Bonded leather surfaces, as they have a plastic coating. Not suitable for faux leather. Does not affect the breathability, colour, or flammability of the leather. Also suitable for bags, leather accessories, and shoes. In normal use, the protection will last for 2–3 years, after which it can be renewed. If any streaks form during the treatment, wipe them off with a soft cloth.

SOFTCARE WATER BASED LEATHER PROTECTOR

Softcare Water Based Leather Protector is **particularly suitable for white leather**, but also for all other leather, suede and nubuck types, including Bycast, Pull up and faux leather. Protects leather surfaces against dirt and moisture. Suitable for all leather types. Spray Leather Protector on the leather surface and even out any drip marks with a lint-free cloth, if necessary. Only use as much of the product as the leather will absorb. Let the protector dry for 24 hours in room temperature before using the treated item.

SOFTCARE LEATHER CLEANER

Softcare Leather Cleaner is a special cleaning agent developed especially for cleaning leather. It maintains the natural suppleness of the material and removes even difficult stains. Also suitable for plastic-coated leather, as well as waxed, oiled and untreated wooden surfaces. Before cleaning, test the product on an area that is not visible. Follow the manufacturer's care instructions. When using Leather Cleaner on suede and nubuck surfaces, the surface must be brushed smooth after cleaning.

SOFTCARE LEATHER BALSAM

Softcare Leather Balsam keeps leather soft and prevents it from drying and cracking. Grain leather should be treated with this product two to three times a year, to prevent drying, and every time after cleaning. The balsam is spread in a very thin layer, with the excess wiped off if necessary. Test the durability of the surface first in an invisible area. Some leather types can darken from the treatment, but the colour is restored in a few days, after the product has been completely absorbed into the leather. Follow the manufacturer's care instructions. Leather Balsam is a natural product based on beeswax, and is suitable for all grain leather products.

SOFTCARE LEATHER CARE KIT

The kit contains:

- Softcare Leather Protector
- Softcare Leather Cleaner
- Softcare Leather Balsam
- Terry cloth and care instructions

SOFTCARE MINI LEATHER CARE KIT

The kit contains:

- Softcare Leather Cleaner
- Softcare Leather Balsam
- Terry cloth and care instructions

SOFTCARE WATER BASED LEATHER CARE KIT

Particularly suitable for white leather! The kit contains:

- Softcare Water Based Leather Protector
- Softcare Leather Cleaner
- Softcare Leather Balsam
- Terry cloth and care instructions

SOFTCARE LIQUID LEATHER CLEANER

Softcare Leather Cleaner is an easy-to-use and efficient cleaner for all kinds of leather surfaces. This cleaner is efficient and is also suitable for coated types of leather and faux leather. Does not damage or dry leather. Sprayed on the surface to be cleaned or directly on the stain, let to react for a few moments, and then rinsed off 2–3 times with clean water and a damp sponge or cloth. Do not make the leather too wet. Let the surface dry thoroughly before use or before applying protection. Protect the clean and dry surface with Leather Protector. After cleaning, the leather surface is treated with Softcare Leather Balsam.

Special products

Are you having problems with static electricity, difficult stains or an unpleasant smell?
Use the help of Softcare's special products.

SOFTCARE ANTISTATIC

Softcare Antistatic is a very efficient antistatic product for all types of furniture, accessories and other surfaces. Removes static electricity immediately, and the effect can last several months, and a few washes. This product can be used, for example, on furniture with artificial fibres, on electronic devices, and plastic surfaces and glass surfaces prone to static electricity. The product is easy to use, and it does not change the colour, characteristics or feel of the treated surface. Test the alcohol-resistance of hard plastic surfaces first on an area that is not visible.

SOFTCARE ODOUR CONTROL

Softcare Odour Control removes unpleasant smells by breaking them down chemically. Can be sprayed directly onto textile surfaces, or used as an air freshener or anywhere with unpleasant smells, even on hands after chopping onions. Efficiently removes various kinds of organic smells, such as smells from animals, bodily excretion, sweat and tobacco. If the smell has been absorbed into the furniture, you can use a syringe to inject the product into the source of the smell. Does not stain surfaces. Non-toxic and safe to use.

SOFTCARE STAIN REMOVER PRO

Softcare Stain Remover Pro is an efficient universal stain remover, designed particularly for interior textiles and clothing. Removes even difficult stains, such as oil, grease, blood, coffee, grass, and chocolate. Does not contain bleach. Also suitable for clothes. Available in 300 ml and 100 ml bottles.

SOFTCARE WINE STAIN REMOVER

Efficient stain remover for difficult wine stains — Softcare Wine Stain Remover. You can easily carry the 100 ml bottle with you.

SOFTCARE FLAME PROTECTOR

Softcare Flame Protector does not prevent burning, but provides valuable extra time for escaping a fire and minimising the damage. The Flame Protector is suitable for treating all porous, flammable materials. Spray on the surface until it becomes moist and let dry. Immediately ready to use. Suitable for indoor and outdoor use.

Care products for outdoor furniture

SOFTCARE OUTDOOR TEXTILE PROTECTOR

Outdoor Textile Protector provides an efficient protection against dirt and moisture for the textile upholstery materials of all outdoor furniture. Also suitable for parasols and awnings. The treatment will protect furniture from moisture and from water and oil based dirt. Softcare Outdoor Textile Protector also protects against pollen becoming attached to the surface of the textiles, making it easy to remove pollen from the material. An excellent product for those with pollen allergies. The protection will last for approximately a year outdoors. Not suitable for woven plastic covers.

SOFTCARE WOOD OIL

Softcare Wood Oil has been developed for oiled and untreated wooden surfaces. This easy-to-use special oil protects wooden outdoor furniture, patio floors and other wooden structures. Suitable for teak, hardwood, impregnated and untreated wooden structures. Provides a good protection against moisture and dirt. Outdoor furniture should be treated 1–2 times during the summer season, so that the surface does not dry and crack. Packages: 500 ml spray bottle and 1 l bottle. Remember! Oily cloths can spontaneously combust due to vapours. Wash the tools and clothes with water and soap immediately after use.

SOFTCARE WASH AND WAX FOR POLY RATTAN

Wash and Wax for Poly Rattan cleans and protects poly rattan patio and garden furniture. It efficiently removes, for example, pollen and food stains, as well as city dust. The waxing will make the furniture dry faster after rain and gives it a beautiful shine. Wash and Wax is environmentally friendly and does not harm lawns.

SOFTCARE WOOD AND PLASTIC CLEANER

Wood and Plastic Cleaner is an efficient special cleaner developed for outdoor plastic and wooden furniture. Suitable for wood, plastic, poly rattan and other water-resistant surfaces. Efficiently removes soot, pollen, city dust and other stubborn dirt. Spray on the surface, wash with a sponge, and rinse the surface clean. The cleaner is environmentally friendly and does not harm lawns.

SOFTCARE AINTWOOD PROTECTOR

Softcare Aintwood Protector is designed for tables and chairs made from plastic, especially polystyrene, to protect their surfaces against grease and other food stains, and pollen from becoming absorbed into the surface pores. The protection makes furniture care easier, and keeps the furniture beautiful for longer. The protection can be renewed when necessary. Spray the protector on the surface and spread evenly with a soft cloth.

SOFTCARE BALCONY CLEANER

Balcony Cleaner is a special cleaner designed for cleaning balcony surfaces, such as floors, tiles, and other wood, concrete and stone surfaces. The ingredients in Balcony Cleaner are environmentally friendly, and it removes dirt efficiently. Apply the cleaner on the surface, let react for a few moments, and rinse with a brush. Finally, rinse with clean water. Do not do the cleaning in direct sunlight, so that the surface does not dry too fast and become splotchy. The concentrate is suitable for use with a pressure washer. Available as ready-to-use solution 500 ml and concentrate 2 l.

SOFTCARE MOULD, MOSS AND ROOF CLEANER

Softcare Mould, Moss and Roof Cleaner is an efficient and environmentally-friendly product, suitable for removing mould and moss from fabric, wood, plastic and roof materials. After cleaning, the dry and clean surface can be treated with protective agents. Spray the product on the surface manually or with a pressure washer, let react for a few moments, and then rinse off with clean water. Repeat the wash and let the solution react for longer if the dirt was not removed during the first wash. Environmentally-friendly ingredients.

Care products for wooden and varnished indoor furniture

SOFTCARE WOOD OIL FOR INDOOR FURNITURE

Softcare Wood Oil for Indoor Furniture is designed for unvarnished indoor wooden surfaces, such as kitchen counters and dining tables. Perfect for teak, oak, and mahogany, and also for heat-treated wood. Wood Oil forms a beautiful and durable surface, and protects the surface from becoming dry or dirty.

SOFTCARE POLISHING WAX

Softcare Polishing Wax is intended to be used on glossy surfaces with a polyurethane finish, such as kitchen doors, tableware and cupboards. Can also be used on glossy laminates and other hard surfaces. Waxing keeps the surfaces glossy and easy to care for, hides small scratches, and prevents stains like fingerprint marks from remaining on the surface. The polishing wax treatment should be redone approximately every two years or as needed. Also removes static electricity.

For all cleaning

SOFTCARE CLEANING SPONGE

The cleaning sponge is an efficient tool for cleaning. The sponge absorbs up to 12 times of its weight of liquid, and cleans quickly even without detergents. Suitable for cleaning all hard surfaces, windows, mirrors, tiles, stainless steel and water-resistant surfaces. The sponge also picks up hair and animal hair from textiles. Very durable. Stored dry, and dampened before use. Can be machine-washed at a maximum temperature of 60 °C.

SOFTCARE POWER WASH

Softcare Power Wash is an all-purpose cleaner designed for removing grease and dirt from the hard surfaces at home. The product was designed using new Softcare technology. It is efficient and environmentally friendly. Use Power Wash on all hard surfaces both indoors and outdoors. Spray on the surface you want to clean or, for example, directly onto your floor cleaning tool and then clean the surface. Rinse to remove any loosened dirt and excess cleaning agent. If the dirt is stubborn, let the agent sit for a few minutes before rinsing.

Environmentally friendly

The ingredients used in Softcare products are always chosen with great consideration towards the environment. The products are packaged in recyclable plastic packaging. Did you know that spray bottles contain up to twice as much product as aerosol bottles of a similar size?

Safety and quality

Softcare products are of high quality, and easy to use. There are also unscented options available. We choose all of the ingredients based on the latest technology, safety, and the best performance.

Finnish

Established in 1991, Soft Protector Oy is a Finnish company specialised in manufacturing protective and special cleaning products for textiles, furniture and clothes. The products are made in Finland.
