Softcare technology

The core of Softcare's product ideology is efficiency combined with safety and environmental friendliness. Our latest cleaning technology is based on carefully chosen next generation water-based materials which efficiently dissolve grease, different types of dirt, and even alkyd paints and bitumen.

With the new series of products, you can efficiently clean a bathroom and sooty fireplace glass, and even remove graffiti and smudges from various surfaces. You can also quickly clean latex rollers and brushes. Our products can even remove urethane from difficult places. The series of products has been found to be effective in several tests.

Today, ailments and allergies resulting from the use of chemicals are all too common. For this reason, proper products must be safe for both consumers and professionals to use. This has been one of the main goals in our product development.

Additionally, our products must be environmentally friendly and they must not put a strain on the environment. All of our cleaning agents that represent the latest technology are highly biodegradable.

Find out more about the new technology Softcare products at your local hardware store, supermarket or our online shop.

WOOD OIL SPRAY 500 ML

Softcare Wood Oil Spray protects tables, chairs, benches and other wooden surfaces in outdoor spaces. It prevents wood from splitting and drying while preserving its beauty for a long time. Spray on a clean and dry surface. Let dry for 12 hours before use.

STAIN REMOVER PRO 300 ML

Softcare Stain Remover Pro is an efficient and environmentally friendly stain remover for different types of stains and all textile surfaces. Does not contain whitening ingredients. Easy to use and biodegradable. Spray Stain Remover Pro on the stain you want to clean, let sit for a few minutes and wipe off with a damp terry cloth, or apply on stains before putting the textile item in the washing machine.

WOOD AND PLASTIC CLEANER 500 ML

Softcare Wood and Plastic Cleaner efficiently removes pollen, urban dust and other dirt from wooden, plastic and poly rattan garden furniture and structures. Environmentally friendly and an effective composition. Spray on the surface you want to clean and let sit for a moment. Rinse with a sponge or a soft brush until clean. Avoid working in direct sunlight.

OUTDOOR TEXTILE PROTECTOR 500 ML

Softcare Outdoor Textile Protector provides efficient and easy-to-use protection for the textile surfaces of outdoor furniture, sunshades, cars and caravans. Prevents pollen from sticking to the fibres, prevents staining and makes the fabric easy to clean. Spray evenly on the surface and let dry for 2 hours before use.

CARPET PROTECTOR 500 ML

Softcare Carpet Protector is an efficient protective agent for indoor and outdoor carpets. Suitable for all types of carpets from silk to wool and cotton. The protective agent prevents fibres from absorbing dirt. Easy to use. Spray 1.5–2.5 dl/m² on the carpet, depending on its thickness. With a deep pile carpet, spread the agent to the roots of the fibres with a rubber glove and then smooth the piles to point in the same direction.

TEXTILE CLEANER 500 ML

Softcare Textile Cleaner is designed for removing all types of dirt from the surfaces of outdoor furniture and interior textiles. Easy to use and environmentally friendly. Spray on a stained surface and let sit for a moment, depending on the amount of dirt and how stubborn the stain is. Rinse with a damp terry cloth until clean. Avoid working in direct sunlight.

STONE PROTECTOR 500 ML

Softcare Stone Protector is suitable for all natural stones, tiles, concrete, the grout between tiles in bathrooms and kitchens, fireplace surfaces and the floor, both indoors and outdoors. Keeps surfaces clean and easy to care for. Does not change the look of the surface. Spray evenly on the surface you want to treat, let dry for 2 hours before use.

STONE CLEANER 500 ML

Softcare Stone Cleaner is designed for removing dirt and other difficult, greasy stains from stone and tile surfaces. Removes difficult stains efficiently. Suitable for all stone surfaces. Biodegradable. Spray on the stained surface and clean using a brush or a sponge. Rinse well to remove all dirt and excess cleaning agent.

AINWOOD PROTECTOR 500 ML

Softcare Aintwood Protector protects the plastic surfaces of outdoor furniture from grease and food stains. It also protects furniture from stains caused by hot food. Protected surfaces do not absorb grease, which makes grease stains easy to remove. Spray the protector on the surface and spread evenly with a soft cloth. Let dry for a day before using the furniture.

POWER WASH 500 ML

Softcare Power Wash is an all-purpose cleaner designed for removing grease and dirt from the hard surfaces at home. The product was designed using new Softcare technology. It is efficient and environmentally friendly. Use Power Wash on all hard surfaces both indoors and outdoors. Spray on the surface you want to clean or, for example, directly onto your floor cleaning tool and then clean the surface. Rinse to remove any loosened dirt and excess cleaning agent. If the dirt is stubborn, let the agent sit for a few minutes before rinsing.

CRYSTAL AND GLASS CLEANER 500 ML

The ready-to-use Crystal and Glass Cleaner is designed for cleaning chandeliers, mirrors and glass surfaces. Leaves the surface stripeless. The product is environmentally friendly. When cleaning chandeliers, turn off the power and protect the surfaces under the chandelier in a sufficiently large area. Spray the cleaning agent on the surface and let it drain away. Repeat until the drainage water is clear. Let dry before use. Clean any other glass surfaces as you normally would clean glass.

WASH AND WAX FOR POLY RATTAN 500 ML

Softcare Wash and Wax for Poly Rattan and other plastic outdoor furniture is an efficient cleaning agent, which simultaneously protects the furniture from getting wet and staining. The product keeps surfaces clean and shiny. Clean your outdoor furniture with a sponge or a soft brush and rinse. Avoid working in direct sunlight.

BBQ CLEANER 500 ML

Softcare BBQ Cleaner efficiently removes burnt grease from the surfaces of grills and grates. The product was designed using new Softcare technology. It is efficient to use and environmentally friendly. Spray on the surface, let sit and remove the burnt dirt using a sponge or a soft brush. Warm the grill before preparing food to ensure that any remaining smells do not stick to the food. Do not apply on painted surfaces.

OVEN CLEANER 500 ML

Softcare Oven Cleaner efficiently removes burnt grease and dirt from ovens. The product was designed using new Softcare technology. It is efficient and environmentally friendly. Spray on a cool surface and let sit for 15 minutes. Rinse the oven carefully. Warm the oven before preparing food to ensure that any remaining smells do not stick to the food.

DETERGENT FOR WORK CLOTHES 1 L / 2 L

The Detergent for Work Clothes is designed for washing work clothes and other clothes and textiles that absorb odours. The detergent efficiently removes any stubborn stains and unpleasant odours. The detergent is environmentally friendly and also suitable for sensitive skin. Use similarly to a normal detergent, but only use 20 ml for a 7 kg load. The product is a concentrate, so always follow the instructions. With one litre of the detergent, you can wash 50 loads in a 7 kg washing machine.

FIREPLACE GLASS AND SOOT CLEANER 500 ML

Softcare Fireplace Glass and Soot Cleaner is an efficient and effective product for removing stubborn soot stains. The product was designed using new Softcare technology. It is efficient to use and environmentally friendly. Fireplace glass doors: Spray on cold glass and let sit for roughly 15 minutes. Remove any dirt with clean water or with a tool. Sooty surfaces: First wet the porous surface with clean water and then spray the cleaning agent on the surface. Let sit for roughly 15 minutes, then clean with clean water using a cloth or a tool and rinse until clean. Does not contain any abrasive ingredients.

GLUE REMOVER 300 ML

Softcare Glue Remover is a new and efficient product for removing glue stains. The product was designed using new Softcare technology. It is efficient and environmentally friendly. Efficiently removes any traces left by stickers, adhesive tapes and various glue stains. Spray on the stain or surface and let sit for a moment. Wash with clean water and an appropriate tool to remove the glue.

SOFTCARE FLAME PROTECTOR 500 ML

Softcare Flame Protector does not prevent burning, but provides valuable extra time for escaping a fire and minimising the damage. The Flame Protector is suitable for treating all porous, flammable materials. Spray on the surface until it becomes moist and let dry. Immediately ready to use. Suitable for indoor and outdoor use.

BATHROOM CLEANER 500 ML

Softcare Bathroom Cleaner is designed particularly for tiles, glass and other hard surfaces in the bathroom. Also removes cosmetic residues. The product was designed using new Softcare technology. It is efficient to use and environmentally friendly. Spray the cleaning agent on the surface you want to clean and rinse with clean water. When removing calcium buildup, you can let the agent sit for a few minutes.

GRAFFITI REMOVER 500 ML / 2 L

Softcare Graffiti Remover is a solvent-free graffiti remover. The product was designed using new Softcare technology. It is efficient to use and biodegradable. Removes smudges and graffiti without solvents. Spread on the surface you want to clean and let sit until the smudge comes out, roughly 15 minutes–2 hours. Rinse the surface with water until clean. Be careful not to remove the base paint.

URETHANE REMOVER 500 ML

Softcare Urethane Remover efficiently removes urethane stains. The product was designed using new Softcare technology. It is efficient to use and environmentally friendly. The cleaning agent is water-based. First cut out any excess pieces. Spread the cleaning agent on the urethane and wait until it comes off. Wipe/scrape or wash the loosened urethane away with a cloth dampened with water and a tool.

LATEX PAINT BRUSH CLEANER 500 ML

Softcare Latex Paint Brush Cleaner makes it easy to remove dried latex paint from brushes. The product was designed using new Softcare technology. It is water-based, efficient and environmentally friendly. Dip the brush or roller into the cleaning agent and let sit for no less than 2 hours. Wash with clean water until clean.

LATEX PAINT REMOVER 500 ML

Softcare Latex Paint Remover is a solvent-free latex paint remover. The product was designed using new Softcare technology. It is water-based, efficient and environmentally friendly. Spread the product on a latex painted surface and let sit for more than 15 minutes or until the paint comes off. Remove with a scraper and rinse with water to remove the softened paint. With thick layers of paint, you can repeat the treatment several times.

PAINT REMOVER 500 ML

Softcare Paint Remover is a new solvent-free paint remover. The product was designed using new Softcare technology. It is water-based, efficient and environmentally friendly. Spread the product on a painted surface and let sit for over 15 minutes or until the paint has dissolved. Remove the dissolved paint and clean the surface with water. With thick layers of paint, you can repeat the treatment several times.

Environmentally friendly

The ingredients used in Softcare products are always chosen with great consideration towards the environment. The products are packaged in recyclable plastic packaging. Did you know that spray bottles contain up to twice as much product as aerosol bottles of a similar size?

Safety and quality

Softcare products are of high quality, and easy to use. There are also unscented options available. We choose all of the ingredients based on the latest technology, safety, and the best performance.

Finnish

Established in 1991, Soft Protector Oy is a Finnish company specialised in manufacturing protective and special cleaning products for textiles, furniture and clothes. The products are made in Finland.
