

SOFTCARE[®]

**Keep your interiors easy to
maintain and fresh looking**

SOFTCARE®

Who are we?

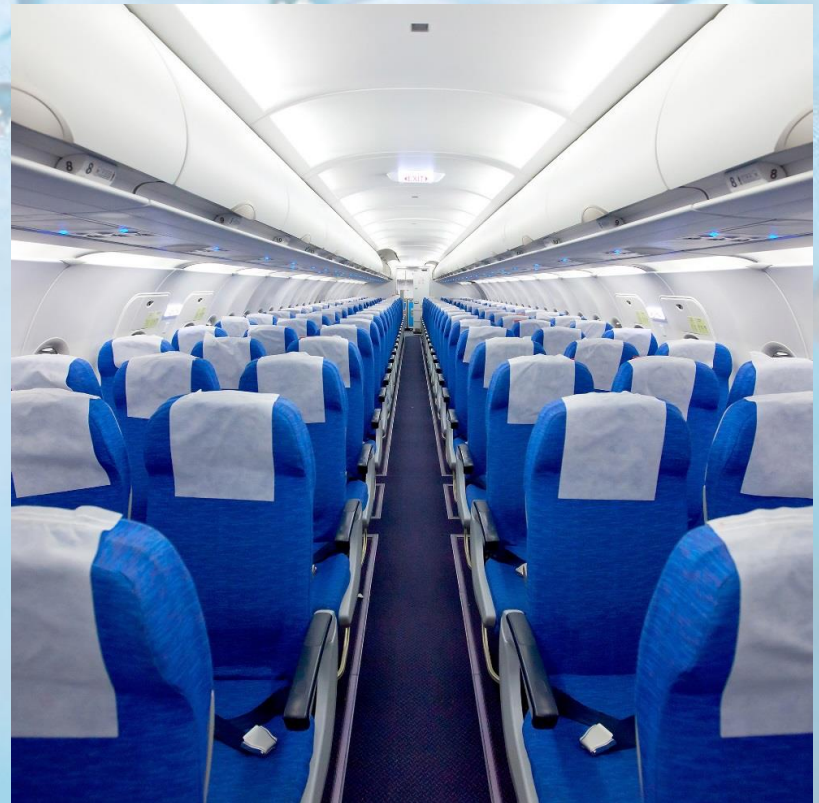

- SOFTCARE is a registered trademark of Soft Protector Ltd. – an innovative Finnish company based in Finland.
- Soft Protector Ltd. has been in materials protection business for over 25 years, and is one of the pioneers in the aftercare market.
- We keep our quality at highest possible level by using only the best and most updated raw materials and with continuous testing and product development.

SOFTCARE®

Protection of surfaces in airplanes

- Softcare protectors are a modern way to keep your textiles and leather fresh, good looking and easy to maintain - saving replacement and maintenance costs
- A product of a new technology and high quality solving a lot of problems

SOFTCARE®

What can be protected?

- Protection can be used in airplane seats, carpets, curtains and clothing of the personnel. Suitable for all fibres used in textiles and leather.
- The products are available according to customers' needs in different sizes of containers for professional use
- Protection is also useful for all kind of airport facilities, e.g. lounges, restaurants and hotels.

SOFTCARE®

How does Softcare work?

- Softcare is a product forming an invisible molecular shield around the fibers and protecting them from oil- and water based stains, dirt and dust
- Softcare doesn't change the color, touch, breathability and flammability of the materials

SOFTCARE®

Protection saves costs

- Our customers save even 80 % of time on textile and carpet maintenance after protection with Softcare!
- By prolonging the useful and attractive life of materials, Softcare cuts maintenance and replacement costs.

SOFTCARE®

Softcare is easy to use

- The Softcare application can be done on the materials on mill-level or at the sewing mill or afterwards.
- Can be applied also in laundry process.
- We can advise in all the technical processes.

SOFTCARE®

Softcare is safe to use

- The raw materials are carefully selected, the latest technology taking in account safety, effectivity and environmental aspects
- All that is left on top of the surface, is safe, non toxic and non flammable.

SOFTCARE®

Softcare is safe for environment

- We have developed the manufacturing processes and selected the raw-materials according to the latest European norms.
- Our company meets the EFQM – standard requirements.

SOFTCARE®

Long lasting effect

- Softcare is a protection that last at least 5 years in high level wearing on planes and other tough circumstances.
- It can be washed at least 10 times without loosing it's effect.
- Keeping your appearance good-looking longer while reducing maintenance and replacement costs.

SOFTCARE®

Product development

- We use the latest technology in our products.
- We continuously develop our products to offer the best quality for our customers.
- We use only the best raw-materials available on the market.
- We follow the needs and listen to our customers in our product development.

SOFTCARE®

Softcare has been tested

- Fire safety: Lantal Textiles AG certifies that the Test results comply with the requirements of FAR/CS 25.853 Appendix F, Part I
- Safety: TUT, Tampere University of Technology, Department of Material Science Technical report 4.1.2016
- TNO Nutrition and food research, the Netherlands, acute 4 h toxicity
- Gore Tex has done the test to prove that Softcare can be used on Gore Tex materials without changing the breathability
- Abrasion test at DTI, DK. After 100.000 abrasion cycles the water repellency of Softcare treated fabric is somewhat reduced.“
- Test made by Heller Läder testing the Softcare Leather Care products. Excellent results.

SOFTCARE®

Softcare – a set of maintaining products

- Softcare Textile, Leather and other surface cleaning and maintenance
- Softcare special cleaning agents, odour removals and antistatic products
